Jiho John Bae

IT Systems Administrator | Identity, Endpoint, Cloud Infrastructure
john21225@gmail.com | (310) 404-1276 | San Francisco, CA | linkedin.com/in/jihobae

PROFESSIONAL SUMMARY

Systems administrator with 4+ years across identity, endpoint management, and server and cloud infrastructure for 30+ client environments at a 100+ client MSP, from 5-person offices to established consumer-goods companies, and for a launch-operations company. Production experience in Entra ID, Intune, Microsoft 365, Google Workspace, Windows and Linux servers, and vSphere; automation in PowerShell and Python; currently building an Okta and Jamf lab. AZ-104 and Security+ certified.

WORK EXPERIENCE

IT Systems Administrator | *C3 Systems and Security* | May 2025 – Present

- Administered identity and access for 30+ client tenants in Entra ID, Microsoft 365, and Google Workspace: SSO, SCIM provisioning, conditional access, and user lifecycle
- Automated onboarding and offboarding in PowerShell and the Azure CLI: provisioning, licensing, groups, and deprovisioning
- Managed Windows and macOS endpoints in Intune: configuration baselines, compliance policies, app deployment, and disk encryption with escrowed recovery keys
- Remediated compromised accounts end to end: session revocation, MFA reset, sign-in log investigation, and malicious inbox rule removal
- Scoped 4 server migrations and ran OneDrive-to-SharePoint migrations with verified backups of business-critical data
- Administered SonicWall firewalls and UniFi networks, including on-site deployments at 5 client sites: VLANs, VPN, firewall rules, and Wi-Fi
- Ran vulnerability checks and patch compliance through NinjaOne RMM; authored the team's runbooks and standard procedures

Server Administrator | *Rocket Lab* | May 2024 – May 2025

- Administered a growing fleet of Windows, Linux, and SQL Server systems on vSphere supporting launch operations
- Built and ran the patch management program across all three platforms, prioritized by vendor advisories and CVE severity
- Audited vSphere for vulnerable virtual machines and drove remediation to current patch levels
- Wrote the patch and maintenance procedures for Windows, Linux, and SQL Server

IT Systems Administrator & Automation Specialist | *Honu Services Inc.* | Jan. 2022 – Oct. 2023

- Built Power Automate and Power Apps automations that cut onboarding and offboarding from an hour to 15 minutes
- Administered Microsoft 365: accounts, mailboxes, groups, and policies
- Managed user access and permissions for AWS EC2 instances

TECHNICAL SKILLS

Identity and access: Entra ID, Microsoft 365, Google Workspace, SSO (SAML, OIDC), SCIM provisioning, conditional access, MFA, user lifecycle automation
Endpoint management: Intune, NinjaOne RMM, Windows, macOS, configuration baselines, compliance, BitLocker
Infrastructure and cloud: Windows Server, Linux, SQL Server, vSphere, Azure, AWS (EC2, IAM)
Networking: SonicWall, UniFi, TCP/IP, DNS, DHCP, VLANs, VPN
Programming: PowerShell, Azure CLI, Python, Power Platform, JavaScript
Security: EDR (SentinelOne, Huntress, Bitdefender GravityZone), incident response, patch and vulnerability management, SIEM

CERTIFICATIONS

Microsoft Certified: Azure Administrator Associate (AZ-104) | Microsoft
CompTIA Security+ | CompTIA
Google Cybersecurity Certificate | Google

EDUCATION

B.S. Computer Information Systems | Cal Poly Pomona
